-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30days MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- ☐ Other: ____.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a process for designing a mass separator, classified in class 250, subclass 282.
- II. Claims 7-8, drawn to a process for designing an ion trap, classified in class 250, subclass 292.
- III. Claims 9-15, drawn to a method for producing a mass separator, classified in class 250, subclass 293.
- IV. Claims 16-23, drawn to a method for producing an ion trap, classified in class 250, subclass 290.
- V. Claims 24-29, drawn to a method for producing an ion trap, classified in class 250, subclass 292.
- VI. Claims 30-34, drawn to a mass separator, classified in class 250, subclass 281.
- VII. Claims 35-48, drawn to a mass spectrometer, classified in class 250, subclass 281.
- VIII. Claims 49-51, drawn to an ion trap, classified in class 250, subclass 292.
- IX. Claims 52-60, drawn to a tandem mass spectrometer, classified in class 250, subclass 296.
- X. Claims 61-67, drawn to an analysis method, classified in class 250, subclass 282.

The inventions are distinct, each from the other because:

Art Unit: 2881

Inventions I-X are distinct, each of the inventions I-X recites the limitations not recited in the other invention. The differing limitations make the inventions I-X patentably distinct from one another, i.e., a reference that anticipates or makes obvious one of the inventions I-X would not by itself anticipate or make obvious the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert C. Hyta on 05-31-2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiet T. Nguyen whose telephone number is 571-272-
